ITSelect

Microsoft Solutions & Managed Services
Strategy | Implementation | Support | Optimization

Microsoft Cloud & Business Solutions

ITSelect brings together specialized Microsoft expertise to help organizations modernize infrastructure, secure the workplace, improve user experience, and connect business operations - from Azure and virtual desktops to Dynamics 365 and the broader Microsoft stack.

ONE POINT OF CONTACT	END-TO-END MICROSOFT	FLEXIBLE ENGAGEMENT
ITSelect coordinates the right specialists for each engagement.	Advisory, migration, implementation, managed services and support.	Projects, ongoing support, assessments and managed services.

Microsoft Full Stack

A connected Microsoft strategy across productivity, cloud, security, data and business applications.

- Microsoft 365, Copilot, Power Platform, Security and AI
- Migration, integration, adoption and ongoing support
- Licensing optimization and cloud solution guidance

Azure Cloud

Modernize infrastructure with secure, scalable Azure services designed around your business requirements.

- Cloud readiness, strategy and migration
- Infrastructure modernization, identity and security
- Cost optimization, governance and ongoing Azure support

Azure Virtual Desktop (AVD)

Deliver secure Windows desktops and applications from Azure while simplifying infrastructure and remote access.

- AVD assessment, design, migration and deployment
- 24x7 monitoring and proactive managed support options
- Performance, patching, security and environment optimization

Citrix

Specialized Citrix services for organizations that need reliable, secure and high-performing digital workspaces.

- Citrix design, implementation, migration and optimization
- 24x7 monitoring, incident management and engineering support
- Image/release management, application performance and security

Dynamics 365

Connect finance, operations, sales and customer engagement with Microsoft's integrated ERP and CRM platform.

- Dynamics 365 ERP and CRM implementation
- Business Central, Finance and Supply Chain modernization
- Migration, integration, Power Platform automation and support

Managed & Professional Services

Extend your IT team with specialized expertise without adding permanent internal headcount.

- Assessments, architecture, implementation and migrations
- 24x7 managed services and advanced technical support
- Security, monitoring, reporting and continuous improvement
