What Worry-Free can do for you

Worry-Free with Managed XDR Service Worry-Free XDR Worry-Free Services Advanced Worry-Free Services

100% SaaS

Complete SaaS solution with no servers to install or maintain, ever

Endpoint Security

Secures Windows (desktops and servers), Mac, iOS, and Android devices by infusing high-fidelity machine learning into a blend of threat protection techniques for the broadest protection against ransomware and advanced attacks

Email Security

Secures Microsoft Exchange, Microsoft 365, Gmail and any other email solution in real time

Stops targeted attacks, spam, phishing, viruses, spyware, and inappropriate content from impacting your business

Includes our latest business email compromise and credential phishing protection capabilities

Allows users to send and receive email during an email service outage

Collaboration Security

Protects online collaboration tools from unknown threats and secures company data from intentional and accidental loss

Extended Detection and Response (XDR)

Detection, response, and investigation capabilities within a single agent, across email and endpoints

Automated root cause analysis, including recommended step-by-step actions, allows quick mitigation

Advanced threat detection by cloud sandboxing included

Cross-customer detection, investigation, and response. (For MSPs only: do it yourself through Trend Micro Remote Manager)

Trend Micro™ Managed XDR Service

Trend Micro security analysts provides 24/7 critical alerting & monitoring

Perform incident investigation, compile reports, and produce root-cause analysis.

Remediate on behalf of customers.

Deliver a quarterly policy assessment on Worry-Free Services.
