

Product portfolio

Barracuda provides comprehensive solutions for email protection, application and cloud security, network security, and data protection that are easy to buy, deploy, and use.

EMAIL PROTECTION

Barracuda Email Protection provides complete cloud email security for Office 365 to stop all 13 email threat types, protect users, and secure your data. Choose the SaaS plan that's right for your business.

Email gateway, anti-phishing, impersonation protection, and essential incident response.

Enhance your essential email security with advanced incident-response tools, brand protection, and web security.

Get complete protection for Office 365 by improving your resiliency with user training, data protection, and email archiving.
